WORK EXPERIENCE

SIGMOID — Bengaluru, India
Associate DataOps Engineer — March 2025 - Present

- Worked on an anomaly detection system leveraging ML models and LLMs to identify and explain irregularities in data.
- Implemented a Data pipeline with a Dead Letter Queue to validate data and fix the data types, with a UI for manual error corrections for failed messages.

SIGMOID — Bengaluru, India
DataOps Intern — Sept 2024 - March 2025

- Training in DevOps tools like Docker, Kubernetes, Cloud providers, Version control, Data Science, and MLOps.
- Engaged in projects related to LLM langchains, React Frontend Development, and deploying, debugging & monitoring applications in clusters.

PERSONAL PROJECTS

RAG-BASED CHATBOT — January 2025

- Developed a Retrieval-Augmented Generation (RAG) pipeline integrating an LLM with Pinecone to deliver context-aware responses and built an interactive Streamlit frontend for user interaction.
- Implemented prompt chain observability and evaluation using LangChain and LangSmith for effective monitoring and debugging.

FILE TRANSFER APPLICATION - CLIENT SERVER MODEL — November 2023

- Implemented a file transfer application utilizing NS-3 for network simulation and socket programming, achieving a 95% success rate in file transfers.
- Defined a client-server model for terminal-based file transfer using Python, handling files up to 1 GB with an average transfer speed of 5 MB/s.

DATA ANALYSIS FOR FRUIT RIPENING DETECTOR — April 2022

- Analyzed data from 10+ fruit samples by measuring resistance to predict ripening time, achieving an 85% accuracy rate.
- Collected data for 14 days and analyzed it using software like Excel, resulting in over 5000 data points.

SKILLS

Programming: C/C++, Python, HTML/CSS, JavaScript, SQL, Scala.
